Re: Your letter of 7-10-61 Pertaining
to our G. C. Matthews No. 6-I,
Section 6-60S-37E, Lea County, N.M.

Mr. Joe D. Baney
P. O. Box 2045
Hobbs, New Mexico

Dear Sir:

As directed, submitted herewith is the deviation data showing that the bottom of subject well is on the 160 acre tract "II". You will recall that in the discussion at your office that by assuming that all deviations were in the same direction that the maximum horizontal displacement from the top to the bottom of the hole could be only 323.22'.

Since this well is located 990' west of the east line and 1650' north of the south line of the above section, the bottom of the hole cannot be closer than 666' to the 160 acre boundary line of this lease. Also, the bottom of the hole cannot be closer than 6' to the quarter-quarter inner boundary line of Unit "I" on which the well is located.

Yours very truly,

J. K. FUSSELL
Area Production Manager
