(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is not capable of production in paying quantities. Well was shut in July 27, 1972, because of high water production. On the last test taken, the well was producing 1 BOPD + 200 BWPD + Zero MCFGPD. We currently have a packer with a bull plug set above the Paddock to prevent any migration of hydrocarbons or water leakage of any nature at the surface. An engineering study is being conducted to evaluate any potential in the Queen and San Andres zones above the Paddock. The estimated date the temporarily abandoned well status may change is the 2nd quarter of 1981.

This approval of temporary JUL 1 1981
abandonment expires.
