

**NEW MEXICO OIL CONSERVATION COMMISSION**  
Santa Fe, New Mexico

**MISCELLANEOUS REPORTS ON WELLS**

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	<b>X</b>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Hobbs, New Mexico

June 13th, 1936

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the \_\_\_\_\_

REPOLLO OIL COMPANY B. J. BARBER Well No. 2 in the  
Company or Operator Lease  
NE 1/4 of Sec. 7, T. 20S, R. 37E, N. M. P. M.,  
MONUMENT Field, LEA County.

The dates of this work were as follows: June 13th, 1936

Notice of intention to do the work was [was not] submitted on Form C-102 on June 10th 19 36  
and approval of the proposed plan was [was not] obtained. (Cross out incorrect words.)

**DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED**

Tested 6-5/8" OD Seamless casing on June 13th with 1200# pump pressure. Closed all valves and allowed to stand for 30 minutes. Tested OK.

Witnessed by E. A. Hales Olsen Drilling Co. Driller  
Name Company Title

Subscribed and sworn to before me this 18

day of June, 1936

Jama Olson

Notary Public

My Commission expires July 29, 1939

I hereby swear or affirm that the information given above is true and correct.

Name L. Smith

Position Dist. Superintendent

Representing Repollo Oil Company  
Company or Operator

Address Box # 156, Hobbs, N.M.

## Chapter 10: The Nervous System

The nervous system is the body's communication system. It consists of the brain, spinal cord, and nerves. The brain is the control center, and the spinal cord is the main pathway for information. Nerves are bundles of fibers that carry messages between the brain and the rest of the body.

### 10.1 The Nervous System and Its Components

The nervous system is divided into two main parts: the central nervous system (CNS) and the peripheral nervous system (PNS). The CNS includes the brain and spinal cord. The PNS includes all the other nerves in the body.

The brain is the control center of the nervous system. It is located in the head and is protected by the skull. The brain is divided into three main parts: the cerebrum, the cerebellum, and the brainstem.

The cerebrum is the largest part of the brain. It is responsible for most of the body's functions, including thinking, feeling, and moving.

#### • The Cerebrum and Its Functions

The cerebrum is divided into two halves, the left and right hemispheres. Each hemisphere is further divided into four lobes: the frontal lobe, the parietal lobe, the temporal lobe, and the occipital lobe.

The frontal lobe is responsible for planning, decision-making, and controlling the body's movements.

The parietal lobe is responsible for processing sensory information from the body, such as touch, temperature, and pain.

The temporal lobe is responsible for processing auditory information and is also involved in memory and language.

The occipital lobe is responsible for processing visual information from the eyes.

#### • The Cerebellum and Its Functions

The cerebellum is a smaller part of the brain located at the back of the head. It is responsible for coordinating movement and balance.

The cerebellum is also involved in learning and memory. It helps the brain to store and retrieve information about the body's movements.

#### • The Brainstem

The brainstem is the part of the brain that connects the cerebrum to the spinal cord. It is responsible for controlling basic life functions, such as breathing and heart rate.

•

The spinal cord is a long, thin, tube-like structure that runs from the base of the brain down to the lower back. It is protected by the vertebrae. The spinal cord is responsible for carrying messages between the brain and the rest of the body.

The spinal cord is divided into two main parts: the cervical region (neck) and the lumbar region (lower back).

The cervical region is responsible for controlling the head and neck.

The lumbar region is responsible for controlling the rest of the body. It is the largest part of the spinal cord.

The sacral region is the smallest part of the spinal cord. It is responsible for controlling the pelvic region.

#### • The Nerves

Nerves are bundles of fibers that carry messages between the brain and the rest of the body. They are found throughout the body, from the brain to the toes.

The nerves are divided into two main types: sensory nerves and motor nerves.
