THEORY OF THE EARTH AND ITS HISTORY

BY J. H. MACLEOD

PROFESSOR OF GEOLOGY IN THE UNIVERSITY OF GLASGOW

This book is a treatise on the theory of the earth and its history, and is intended for the use of students of geology. It is written in a clear and concise style, and is well illustrated with diagrams and figures. The book is divided into two parts, the first of which deals with the general principles of geology, and the second with the history of the earth.

The first part of the book is devoted to the study of the earth's structure and composition.

The second part of the book is devoted to the study of the earth's history, and is divided into three sections. The first section deals with the history of the earth from the beginning of time to the present day. The second section deals with the history of the earth from the beginning of time to the present day. The third section deals with the history of the earth from the beginning of time to the present day.

The book is well illustrated with diagrams and figures.
