

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	5 1/2"	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Hobbs, New Mexico March 6th 1937

Place Date

OIL CONSERVATION COMMISSION,
SANTA FE, NEW MEXICO.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the
Gulf Oil Corporation - Gypsy Divn Theo Anderson Well No. #3 in the
 Company or Operator Lease
SE/4 of Sec. 8, T. 20S, R. 37E, N. M. P. M.,
Monument Field, Lec. County.

The dates of this work were as follows: Cemented March 2nd 1937 -- Tested March 5th 1937.

Notice of intention to do the work was [~~was not~~] submitted on Form C-102 on March 2nd 19 37
 and approval of the proposed plan was [~~was not~~] obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

The hole was washed down the casing tested with 1200# pressure applied for 30 mins., the plug drilled and the hole tested with 1200# pressure applied for 30 mins.; both tests were OK and after approval of Mr. Vesely State Oil & Gas inspector, preparations were made to drill ahead.

Witnessed by Lester LaFavour Gulf Foreman.
Tom McChesney Loffland Bros Tool pusher.

Mathematical Analysis

The first part of the course deals with the theory of functions of a real variable. It covers the properties of continuous functions, the Riemann integral, and the differentiation of functions. The second part of the course deals with the theory of functions of a complex variable. It covers the properties of analytic functions, the Cauchy integral, and the residue theorem.

The third part of the course deals with the theory of differential equations. It covers the theory of ordinary differential equations and the theory of partial differential equations. The fourth part of the course deals with the theory of Fourier series and the theory of Fourier integrals.

The fifth part of the course deals with the theory of probability and statistics. It covers the theory of random variables, the theory of probability distributions, and the theory of statistical inference. The sixth part of the course deals with the theory of stochastic processes.

The seventh part of the course deals with the theory of queueing systems. It covers the theory of single-server queueing systems and the theory of multi-server queueing systems. The eighth part of the course deals with the theory of Markov chains.

The ninth part of the course deals with the theory of renewal theory. It covers the theory of renewal processes and the theory of renewal reward processes. The tenth part of the course deals with the theory of reliability theory.

The eleventh part of the course deals with the theory of stochastic control. It covers the theory of stochastic control problems and the theory of stochastic control systems. The twelfth part of the course deals with the theory of stochastic games.

The thirteenth part of the course deals with the theory of queueing networks. It covers the theory of single-class queueing networks and the theory of multi-class queueing networks. The fourteenth part of the course deals with the theory of queueing systems with finite capacity.
