ICO OIL CONSERVATION CC

SION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

ADMINISTRATIVE INFORMATION

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the problem has been identified, the next step is to develop a plan of action. This plan should be based on a clear understanding of the problem and the resources available to solve it. The plan should also take into account the needs and interests of all those affected by the problem. Once the plan has been developed, the next step is to implement it. This involves putting the plan into action and monitoring the progress of the solution. Finally, the last step is to evaluate the results of the solution. This involves assessing the effectiveness of the solution and identifying any areas for improvement.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
