THE TREATMENT OF TUBERCULOSIS

By J. H. HARRIS, M.D., and J. H. HARRIS, M.D.,  
Department of Medicine, University of Chicago, Chicago, Ill.

THE TREATMENT OF TUBERCULOSIS

It is the purpose of this paper to discuss the treatment of tuberculosis in the light of the latest findings in the field of bacteriology and pathology.

The treatment of tuberculosis has been the subject of much discussion and controversy in recent years. The various methods of treatment have been based on different theories of the disease.

The first method of treatment was the use of rest and fresh air. This was based on the theory that the disease was caused by a deficiency of these factors.

The second method was the use of food. This was based on the theory that the disease was caused by a deficiency of food.

The third method was the use of drugs. This was based on the theory that the disease was caused by a specific microorganism.

The fourth method was the use of surgery. This was based on the theory that the disease was caused by a local infection.

The fifth method was the use of X-rays. This was based on the theory that the disease was caused by a deficiency of X-rays.

The sixth method was the use of ultraviolet light. This was based on the theory that the disease was caused by a deficiency of ultraviolet light.

The seventh method was the use of heat. This was based on the theory that the disease was caused by a deficiency of heat.

The eighth method was the use of cold. This was based on the theory that the disease was caused by a deficiency of cold.

The ninth method was the use of electricity. This was based on the theory that the disease was caused by a deficiency of electricity.

The tenth method was the use of magnetism. This was based on the theory that the disease was caused by a deficiency of magnetism.

The eleventh method was the use of radioactivity. This was based on the theory that the disease was caused by a deficiency of radioactivity.

The twelfth method was the use of the sun. This was based on the theory that the disease was caused by a deficiency of the sun.

The thirteenth method was the use of the moon. This was based on the theory that the disease was caused by a deficiency of the moon.

The fourteenth method was the use of the stars. This was based on the theory that the disease was caused by a deficiency of the stars.

The fifteenth method was the use of the planets. This was based on the theory that the disease was caused by a deficiency of the planets.

The sixteenth method was the use of the galaxies. This was based on the theory that the disease was caused by a deficiency of the galaxies.

The seventeenth method was the use of the universe. This was based on the theory that the disease was caused by a deficiency of the universe.

The eighteenth method was the use of the cosmos. This was based on the theory that the disease was caused by a deficiency of the cosmos.

The nineteenth method was the use of the world. This was based on the theory that the disease was caused by a deficiency of the world.
