# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

THE first question which presents itself to the mind, is, what was the cause of the origin of the earth? and the answer is, that it was the result of a process of condensation, which took place in the æther, or in the space between the stars.

It is now necessary to enquire, what was the cause of this condensation?

The answer is, that it was the result of a process of attraction, which took place between the particles of the æther.

It is now necessary to enquire, what was the cause of this attraction?

The answer is, that it was the result of a process of vibration, which took place in the æther.

It is now necessary to enquire, what was the cause of this vibration?

The answer is, that it was the result of a process of collision, which took place between the particles of the æther.

It is now necessary to enquire, what was the cause of this collision?

The answer is, that it was the result of a process of expansion, which took place in the æther.

It is now necessary to enquire, what was the cause of this expansion?

The answer is, that it was the result of a process of contraction, which took place in the æther.

It is now necessary to enquire, what was the cause of this contraction?

The answer is, that it was the result of a process of expansion, which took place in the æther.

It is now necessary to enquire, what was the cause of this expansion?
