 Title OIL & GAS INSPECTOR

# THEORY OF THE EARTH

## CHAPTER I. OF THE ORIGIN OF THE EARTH.

The origin of the earth is a subject which has attracted the attention of philosophers from the earliest times. The ancients were divided into two schools, the one of which held that the earth was created out of nothing, and the other that it was formed out of pre-existing matter.

The former school, which was the more numerous, held that the earth was created out of nothing, and that it was the work of a divine power. The latter school, which was the more philosophical, held that the earth was formed out of pre-existing matter, and that it was the result of natural causes.
