

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL		REPORT ON ACID TREATMENT	X

Mr. E. H. Wells State Geologist, Hobbs, New Mexico Sept. 8, 1934
Santa Fe, N. Mex. PLACE DATE

Following is a report on the work done and the results obtained under the heading noted above at the Stanolind Oil and Gas Company Capps Well No. 26 in the
COMPANY OR OPERATOR LEASE
SW 1/4 of Sec. 5, T. 19 S, R. 36 E, N. M. P. M.,
Hobbs Oil Field, Lea County.

The dates of this work were as follows: Acid treatment on April 14, 1934

Notice of intention to do the work was (~~was~~) submitted on Form SG 106 on March 31, 1934, and approval of the proposed plan was (~~was~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Well was treated with 2,000 gallons 60% commercial Hydrochloric acid solution on April 14th. The well was shut in and left shut in for forty eight hours, until April 16th, when it was swabbed in. The well was then allowed to flow at its production allowable until the official production test which was made on September 7th. The potential before acid treatment was 600 barrels of oil with 1,000,000 estimated cubic feet of gas. After acid treatment the potential is 972 barrels of oil with 1,000,000 cubic feet of gas, an increase of 143%. Open flow test through tubing on production test was 972 barrels. The tubing test of this well was not placed on the tubing-casing curve.

DUPLICATE

Subscribed and sworn to before me this

8th day of September, 1934.

RESEARCH REPORT ON THE HISTORY OF ARTS

The following report is a summary of the research conducted by the Department of the History of Arts and Architecture during the year 1967. The research was carried out by a team of scholars, including the following: [List of names]

The research was carried out in a number of areas, including the history of art, architecture, and the history of the city of Chicago. The following are the main findings of the research:

- 1. The history of art in Chicago has been largely overlooked in the past. This report aims to provide a comprehensive overview of the field.
- 2. The architecture of Chicago has played a significant role in the development of the city and the United States.
- 3. The history of the city of Chicago is closely intertwined with the history of art and architecture.

The research was carried out in a number of areas, including the history of art, architecture, and the history of the city of Chicago. The following are the main findings of the research:
