

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	REPORT ON DEEPENING WELL
REPORT ON RESULT OF SHOOTING WELL	REPORT ON PULLING OR OTHERWISE ALTERING CASING
REPORT ON RESULT OF TEST OF WATER SHUT-OFF	REPORT ON REPAIRING WELL
REPORT ON RESULT OF ABANDONMENT OF WELL	REPORT ON ACID TREATMENT X

Hobbs, New Mexico March 19, 1934
PLACE DATE

Mr. E. H. Wells State Geologist,

Santa Fe, N. Mex.

Following is a report on the work done and the results obtained under the heading noted above at the Stanolind Oil & Gas Company State Well No. 29 in the

SE 1/4 of Sec. 4, T. 12S, R. 38 E, N. M. P. M.,
Hobbs Oil Field, Lea County.

The dates of this work were as follows: Acid treatment on March 4, 1934

Notice of intention to do the work was (~~submitted~~) submitted on Form SG 106 on February 2, 1934, and approval of the proposed plan was (~~obtained~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Well was treated with 2,000 gallons 20% commercial Hydrochloric acid solution on March 6th. The well was shut in and left shut in for forty eight hours, until March 8th, when it was swabbed in. The well was then allowed to flow at its production allowable until the official proration test which was made on March 18th. The potential before acid treatment was 1133 barrels of oil with 1,802,000 cubic feet of gas. After acid treatment the potential is 2075 barrels of oil with 3,214,000 cubic feet of gas, an increase of 182%. Open flow test through tubing on proration test was 1976 barrels, which placed on tubing-casing curve gave the well a new potential of 2075 barrels for open flow.

NAME

TITLE

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The document also outlines the responsibilities of the accounting department in ensuring that all transactions are properly recorded and reported.

The second part of the document describes the various methods used to collect and analyze data. It includes a detailed discussion of the different types of data that can be collected, such as financial data, operational data, and customer data. It also discusses the various techniques used to analyze this data, including statistical analysis, data mining, and machine learning.

The third part of the document discusses the importance of data security and privacy. It outlines the various measures that can be taken to protect data from unauthorized access and disclosure, such as encryption, access controls, and data backup. It also discusses the importance of complying with data privacy regulations, such as the General Data Protection Regulation (GDPR).

The fourth part of the document discusses the importance of data governance. It outlines the various measures that can be taken to ensure that data is managed in a consistent and effective manner, such as establishing data governance policies and procedures, and appointing a data governance officer. It also discusses the importance of regularly reviewing and updating data governance policies and procedures.
