DEPARTMENT OF THE STATE GEOLOGIST
NOTICE OF INTENTION TO DRILL NEW WELL

Notice must be given to the State Geologist or to the proper Oil and Gas Inspector and approval obtained before drilling begins. If changes in the proposed plan are considered advisable a copy of this notice showing such changes will be returned to the sender. Submit this notice in triplicate. One copy will be returned following approval.

Mr. E. H. Wells, State Geologist. Denver, Colo. ~~N. Mex.~~, 11-7-32 1932

Dear Sir: You are hereby notified that it is our intention to commence the drilling of a well to be known as Thorpe Well No. 26 in NW $\frac{1}{4}$ of Sec. 10 T. 19, R. 38, N. M. P. M., Hobbs Oil Field _____ County

AREA 640 ACRES
LOCATE WELL CORRECTLY

The well is 660 feet (N.) of South line and 660 feet (E.) of East line of NW $\frac{1}{4}$ of Section 10.
(Give location from section or other legal subdivision lines. Cross out wrong directions.)

If state land the oil and gas lease is No. _____
Assignment No. _____

If patented land the owner is _____
Address _____

The lessee is _____ Address _____
The elevation of the derrick floor above sea level is _____ feet. We propose to drill well with No. Rotary Method Make of Drill _____

We propose to use the following strings of casing and to land or cement them as indicated.

Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented
<u>16"</u>	<u>70#</u>	<u>New Conductor</u>	<u>200'</u>	<u>Set and Cement</u>
<u>10-3/4"</u>	<u>45.50</u>	<u>New Seamless</u>	<u>1700'</u>	<u>Set and Cement</u>
<u>8-5/8"</u>	<u>36#</u>	<u>New Seamless</u>	<u>4000'</u>	<u>Set and Cement</u>

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 4200 feet.

Additional information: Will drill well with the intention of encountering commercial production at approximately 4200'. Will set and cement approximately 200' 16" 70# new casing conductor. Will set and cement approximately 1700' 10-3/4" 45.50# New Seamless Casing. Will set and cement approximately 4000' 8-5/8" 36# New Seamless casing. All work to be done in accordance with best oil field practice and conforming to the oil and gas regulations of the State of New Mexico.

Approved Nov 10, 1932

Remarks:

T. A. Stancliff
NAME T. A. STANCLIFF TITLE

The first part of the document discusses the importance of maintaining accurate records of all transactions and the role of the accounting department in ensuring the integrity of the financial data.

It is essential for the accounting department to implement robust internal controls to prevent fraud and ensure the accuracy of the financial statements. This includes regular audits and the use of reliable accounting software.

The second part of the document outlines the various financial ratios and metrics used to assess the company's financial health. These include the current ratio, debt-to-equity ratio, and return on equity.

These ratios provide valuable insights into the company's liquidity, solvency, and profitability. By analyzing these metrics over time, management can identify trends and make informed decisions about the company's financial strategy.

The third part of the document discusses the impact of external factors on the company's financial performance. This includes changes in market conditions, interest rates, and government regulations.

Management must stay vigilant and adapt to these external changes to maintain the company's financial stability. This may involve adjusting the company's capital structure or revising its investment strategy.

The fourth part of the document provides a detailed analysis of the company's cash flow. It examines the sources of cash and the uses of cash, highlighting the company's ability to generate and manage its cash resources effectively.

Finally, the document concludes with a summary of the key findings and recommendations. It emphasizes the need for continued monitoring and reporting to ensure the company's long-term financial success.

The accounting department is committed to providing accurate and timely financial information to management and stakeholders. We will continue to work closely with other departments to ensure the company's financial health and growth.

THE HISTORY OF THE CITY OF NEW YORK FROM 1624 TO 1898

THE HISTORY OF THE CITY OF NEW YORK FROM 1624 TO 1898

The history of the City of New York from 1624 to 1898 is a story of growth, change, and achievement. It begins with the first Dutch settlement in 1624, when a group of men, led by William Kieft, established a trading post on the island of Manhattan. Over the years, the settlement grew into a city, and the Dutch became the dominant force in the region. In 1674, the British took control of the city, and the Dutch were expelled. The city then became a British colony, and its growth continued. In 1790, the city was incorporated as the City of New York, and its status as a major center of commerce and industry was firmly established. By 1898, the city had grown into a metropolis, and its influence was felt throughout the world.

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF	<input checked="" type="checkbox"/>	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL
