(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

February 19, 1958

Well No. 1 is located 2310 ft. from N line and 330 ft. from E line of sec. 7

SW/4 SW/4 NW/4 19S 39E NMPM
(Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wilcox Lee New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3618 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to set 13 3/8" surface casing at approximately 300' and cement to surface. At approximately 3100', plan to set 8 5/8" 32# casing and cement with 250 sac cement. The hole will then be drilled to approximately 4500' to test the San Andres (anticipated top 4375'). Should conditions warrant drilling will proceed to approximately 6500' to test the Clearfork (anticipated top 6250'). The oil string will be 5 1/2" 15.5# and will be cemented with sufficient cement to cover any and all prospective pay zones as determined from information gathered during drilling. It is planned to drill the entire hole with a salt base mud.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Samadan Oil Corporation

Address Box 2137

Hobbs, New Mexico

By G. W. Putnam

Title District Superintendent

APPROVED

The approval granted herein is subject ^{To} of the following conditions:

(1) Sufficient cement must be used behind the intermediate string to cover the top of the well.

Approval is also granted to delete the surface string if cement behind intermediate string of casing is circulated to surface.
