17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well has been shut in for several years after production had declined to less than 1 BOPD. It was swab tested in 1968 w/100% water recovery. No remedial or secondary prospects exist. We propose to P & A as shown below:

Load hole w/9#/gal gel mud and spot these cement plugs: 25 sx from 3475' to 3674' (Perfs 3544-3620 & OH 3643-3674') 25 sx from 1400' to 1650' (across top of Anhydrite @ 1565') 10 sx in surface

13-3/8" csg @ 65' and $5\frac{1}{2}$ " csg @ 3643' were cemented to surface and will remain intact. Dry hole marker will be erected and location cleared and leveled.

AMENDMENT: Place additional 25-sack plug at 3275-3475 feet or increase bottom plug to 50 sacks.

| 18. I hereby certify that the toregoing is true and correct | | |
