FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Present total depth of well - 3936'. 7"OD casing set at 3777'.
 Well at present time is producing with gas-oil ratio of 28789/1.
 Temperature survey indicated suitable packer points at 3825/28 and 3835/42 feet, and that considerable gas was coming into well from above these points.

We propose to kill well using oil, pull tubing and re-run same back in well w/ a 5-1/2" Lane-Wells Formation Anchor packer which we will at first attempt to set at 3825/28 feet. We will use 3" tubing for anchor with a perforated nipple below the packer. Well will then be swabbed back in for test.
