

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the \_\_\_\_\_

**SUN OIL COMPANY** - **Wm. Navesty** Well No. **6** in the  
Company or Operator Lease  
**NE/4** of Sec. **35**, T. **19-S**, R. **36-E**, N. M. P. M.,  
**Monument** Field, **Lee** County.

The dates of this work were as follows: **June 27, 1936.**

Notice of intention to do the work was [was not] submitted on Form C-102 on **Not required** 19\_\_\_\_  
and approval of the proposed plan was [was not] obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Well flowed 2 hours in pit after being treated with  
4000 gallons of acid; made 44 barrels 3rd hour and 35  
barrels 4th hour flowing in tank.

See letter of July 8, 1936 Santa Fe Files  
CATE

Witnessed by **T. J. Sweeney** **Sun Oil Company** **Field Sup't.**  
Name Company Title

Subscribed and sworn to before me this \_\_\_\_\_

6th day of June, 1936

**John S. McDermott**  
Notary Public  
Dallas County, Texas.

My Commission expires **June 1, 1937.**

I hereby swear or affirm that the information given above is true and correct.

Name **John A. Little**Position **Superintendent.**Representing **SUN OIL COMPANY**  
Company or OperatorAddress **Dallas, Texas.**

Figure 1 consists of two line graphs, (a) and (b), showing the effect of temperature on the growth of *E. coli*. Both graphs plot growth rate (h<sup>-1</sup>) on the y-axis against temperature (°C) on the x-axis. The x-axis ranges from 10 to 50 °C. The y-axis ranges from 0 to 1.0 h<sup>-1</sup>.

Graph (a) shows the growth rate of a control (open circles) and a mutant (filled circles). The control growth rate increases with temperature, peaking at approximately 0.8 h<sup>-1</sup> at 37 °C, and then decreases. The mutant growth rate is lower than the control, peaking at approximately 0.6 h<sup>-1</sup> at 37 °C, and then decreases.

Graph (b) shows the growth rate of a control (open circles) and a mutant (filled circles) at different pH levels. The control growth rate increases with temperature, peaking at approximately 0.8 h<sup>-1</sup> at 37 °C, and then decreases. The mutant growth rate is lower than the control, peaking at approximately 0.6 h<sup>-1</sup> at 37 °C, and then decreases.

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1865. It is a very important document, as it is the first official communication from the President to the Congress since the Reconstruction era. The letter discusses the state of the Union and the progress of Reconstruction. It also mentions the President's plans for the future of the country.
