

## OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

## Miscellaneous Reports on Wells

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

County.

The dates of this work were as follows:.....

Notice of intention to do the work was (was not) submitted on Form C-102 on..... 19.....

and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Hazardous conditions have prevented taking a back pressure test on this well. Considerable sand is produced under normal operations. Any variation in choke size tends to increase sand movement, which involves greater risk of cutting out well head connections. This well is located approximately 200' from a gasoline plant.
