Place

Date

OIL CONSERVATION COMMISSION,  
 Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the \_\_\_\_\_

**The Texas Company's H. D. McKinley** Well No. 1 in NW 1/4 SW 1/4

Company or Operator

Lease

of Sec. 4, T. 19-S, R. 38-E, N. M. P. M., Hobbs Field.

Lea County.

**FULL DETAILS OF PROPOSED PLAN OF WORK**

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well was drilled to Total depth of 4185' and completed September 9, 1930, flowing natural 6864 barrels pipe line oil on 24 hours test. After treating with 2000 gallons Dowell "A" acid from 3960-4185', on 4-18-34, well produced 9509 barrels net oil, 28 1/2% BS&W.

Water encroachment killed well, and repeated swabbing would not return well to flowing status. We therefore desire to clean out, plug back with cement, wooden limit plug and lead wool to approximately 4040' in an attempt to reduce water production and allow well to be returned to flowing status.

Approved \_\_\_\_\_  
 except as follows:
