# Introduction

The purpose of this report is to

investigate the effects of

the proposed changes on the system. The results of the investigation will be presented in the following sections.

## 1. Objectives

The objectives of this study are to determine the impact of the proposed changes on the system's performance and to identify any potential risks.

### 1.1 Scope

The scope of this study is limited to the following areas:

• The impact of the proposed changes on the system's performance.

• The impact of the proposed changes on the system's security.

• The impact of the proposed changes on the system's reliability.

The results of the investigation will be presented in the following sections.

• The impact of the proposed changes on the system's performance.

• The impact of the proposed changes on the system's security.

• The impact of the proposed changes on the system's reliability.

• The impact of the proposed changes on the system's maintainability.

• The impact of the proposed changes on the system's portability.

• The impact of the proposed changes on the system's interoperability.

• The impact of the proposed changes on the system's compatibility.

• The impact of the proposed changes on the system's scalability.

• The impact of the proposed changes on the system's flexibility.

• The impact of the proposed changes on the system's performance.

• The impact of the proposed changes on the system's security.

• The impact of the proposed changes on the system's reliability.

• The impact of the proposed changes on the system's maintainability.

• The impact of the proposed changes on the system's portability.

• The impact of the proposed changes on the system's interoperability.

• The impact of the proposed changes on the system's compatibility.

• The impact of the proposed changes on the system's scalability.
