

## NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

## MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Figure 1 is a line graph illustrating the percentage of the total sample for various age groups over time, from 1980 to 2100. The Y-axis represents the percentage of the total sample, ranging from 0 to 20. The X-axis represents the year, with labels every five years from 1980 to 2100. The age groups are represented by different symbols: 0-14 (solid circle), 15-24 (open circle), 25-34 (solid square), 35-44 (open square), 45-54 (solid triangle), 55-64 (open triangle), 65-74 (solid diamond), and 75+ (open diamond). The graph shows a significant shift in the population structure over time, with the youngest age group (0-14) decreasing from about 20% in 1980 to near 0% by 2050, and the oldest age group (65-74) increasing from about 15% in 1980 to over 40% by 2050. The 15-24 age group also shows a steady decline, while the 25-34 and 35-44 groups show a slight increase before declining after 2050. The 45-54 and 55-64 groups show a steady increase, peaking around 2050 before declining. The 65-74 group shows a steady increase, peaking around 2050 before declining. The 75+ group shows a steady increase, peaking around 2050 before declining.
