Oil Conservation Commission
P. O. Box 2045
Hobbs, New Mexico

Gentlemen:

In reply to your reminder of the condition of the water well at Shell Terry No. 1, this hazard has been remedied and it is felt will no longer constitute a hazard.

The well was cleared of debris at the surface, a wooden plug was driven to approximately 10-feet and a cement plug poured above this. The crater was filled and the site leveled to conform with the surrounding terrain.

Very truly yours,

W. E. Owen
Division Manager
