

Hobbs, New Mexico.
April 21st, 1936.

Mr. F.J. Vesely
State Oil & Gas Inspector
Carlsbad, New Mexico.

Dear Sir:-

I am returning the requests for permission for saving braden-head gas on the Eunice King Well No.1, and Graham State C #3.

Our Tulsa office is sending you a letter changing the casing program, of setting the casing above the salt to thru the salt.

After you have received the request for change of the casing program on these two wells, would like for you to reconsider the attached requests. This will be very muchly appreciated.

CCC/c

Yours very truly,
