DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed strings; indicate mudding jobs, cementing points, and all other important proposed work)

Pulled dual-zone tubing strings & dual-zone packer. Re-ran both strings with a new replacement dual-zone packer. Made packer leakage test which indicated no communication between the two producing zones, Pennsylvanian (Bend) Gas and Devonian Oil.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
