(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

December 10, 1963

Well No. 3 is located 1980 ft. from NW line and 1980 ft. from E line of sec. 13

NW of SE of Sec 13 20-S 34-E (Meridian)
 (1/4 Sec. and Sec. No.) (Twp.) (Range)
 Lea Devonian & Lea Penn Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3674 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Packer leakage test, conducted December 10, 1963, indicates communication between the two producing zones, Devonian & Bend Gas. We plan to start work on this well to make the necessary repairs to eliminate this communication.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Marathon Oil Company
