17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We plan to re-enter this hole, clean out 7" casing to the top of 4½" liner which is at 10,675', squeeze all perforations and test same and clean out to the top of 4½" liner again, set a A-1 tool casing whipstock, cut window in casing and drill a 6¼" hole to 12,600' or the Devonian. It is estimated this deviation will vary from 1 to 3½ degrees which will give us approximately 20 to 35 feet away from the old hole. Should our deviation exceed the rules and regulations, we will follow with a deviation survey showing where the bottom of the hole is. It is planned to squeeze all perfs with approximately 150 sacks.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
