SUBSEQUENT REPORT OF:

WATER SHUT-OFF ☐FRACTURE TREATMENT ☐SHOOTING OR ACIDIZING ☐(Other) setting production liner ☐REPAIRING WELL ☐ALTERING CASING ☐ABANDONMENT* ☐(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We had set and cemented 7", 20#, J -55 pipe to 3157 feet; drilled inside this salt string down through the Yates to the Seven Rivers reef and found no oil so we stopped at 3606' and set 4½", 9.5#, J-55 with tubing on bottom of holes and cemented this liner with 103 sxs of class "C" neat cement with Gilsonite to prevent oil zone invasion. This liner went from TD back up to 2981 (inside 7" pipe 176 feet).

18. I hereby certify that the foregoing is true and correct
