United States Geological Survey  
Post Office Box 1157  
Hobbs, New Mexico 88240

Gentlemen:

On October 3, 1973, a hearing was held by the Oil Conservation Commission to consider the application of Belco Petroleum Corporation to form a non-standard gas proration unit and drill a well on this unit at an unorthodox location of 660' FSL & 1300' FEL, Section 30, T-20-S, R-33-E, Lea County, New Mexico. A copy of this application is attached for your information.

Due to our not having received the action of the Oil Conservation Commission on this matter at this time, Belco Petroleum Corporation is submitting the New Mexico Oil Conservation Commission Form C-102 without the acreage dedicated to the subject well outlined as would be normal. Upon receiving the action taken by the Oil Conservation Commission on the non-standard unit, we plan to resubmit the form C-102 properly completed.

Attached for record are the receipts for the letters sent by registered mail to the potash lessees located within one mile of the proposed location informing them of our intention to drill.

In addition to the above are attached the normal forms required with nine copies. Should you need any additional information, please advise.

Very truly yours,

BELCO PETROLEUM CORPORATION
