13. Describe Proposed or Completed Operations: Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.

On June 7, 1995, M. Levan filed a notice of intent to perform mechanical integrity test on the subject well. A follow-up report was to be filed with a pressure chart showing the results of said MIT. The test was performed on July 21, 1995 and witnessed by Stephen J. Caffey. Subsequently, M. Levan was transferred to another position out of the EMSU-B project and the paperwork was not filed timely.

We respectfully request, at this time, that you accept this late filing and a copy of originally witnessed pressure chart as evidence that the subject well has good mechanical integrity.

The attached pressure chart shows that the well's casing was pressured to 600 psi. It held that pressure for approximately 1 hour. Also find attached a copy of the original intent form approved by Joe G. Lara.

I appreciate your consideration of this filing. **APPROVED FOR 12 MONTH PERIOD**  
**ENDING 1/17/97**

Respectfully,  
Les D. Munson

Petroleum Engineer
