

8. ANCILLARY FACILITIES:

- A. None required.

9. WELLSITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the well pad, mud pits, reserve pit, trash pits and location of major rig components.
- B. Only minor levelling of the wellsite will be required. No significant cuts and fills will be necessary.
- C. The reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the wellsite to the satisfaction of the Fee Owner.
- B. Any unguarded pits containing fluids will be fenced until all are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the Fee Owner's requirements.

11. OTHER INFORMATION:

- A. Topography: Land surface is gently sloping to the northwest. From the wellsite, the land surface slopes gently to the northwest at about 50 feet per mile.
- B. Soil: Soil is a deep fine sand underlain by caliche.
- C. Flora and Fauna: The vegetative cover is generally sparse and consists of mesquite, yucca, shinnery oak, sandsage and perennial native range grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove, quail, and an occasional antelope.
- D. Ponds and Streams: There are no rivers, streams, lakes or ponds in the area.
