

Proposed Development Plan for Surface Use

1. Existing roads including location of exit from main highway.

Detailed map showing drillsite location in relation to the nearest town and all existing roads within one mile of the wellsite are shown on Exhibit A.

From Monument go west on paved road 2.4 miles, turn south on dirt road 3.7 miles, turn west on dirt lease road .2 miles. Location is directly adjacent to dirt lease road. (See Exhibit B)

2. Planned access roads.

Existing roads will be used to reach location.

3. Location of existing wells.

All existing well within one mile radius are shown on Exhibit C.

4. Location of tank batteries and flow lines

If the well is commercially productive, the production facilities (i.e. tanks, separators, & treaters) will be produced into existing tank battery.

5. Location and type of water supply.

Fresh & brine water to be hauled by commercial hauler.

6. Source of construction materials.

Caliche will be obtained from an existing pit located 1 1/4 miles north of well location. (See Exhibit B)

7. WASTE DISPOSAL

- a. Drill cuttings will be disposed of in the reserve pit.
- b. Drilling fluids will be allowed to evaporate in the reserve pit until the pit is dry.
