Packer Leakage Test

Gentlemen:

We received today a copy of an amendment to NSL-2256 which approved the unorthodox location for the Lea Bcne Spring zone of the above-referenced well. We are currently assigning an allowable to this zone.

However, you still need to submit a packer leakage test for this dually completed well. Our rule requires that you are to conduct a packer leakage test upon completion, annually, and at any time the packer is disturbed. Please submit the packer leakage test immediately.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton  
Supervisor, District I
