Re: Byers, 8605-JV-P #1-H
Sec 23, T20S, R35E

Gentlemen:

In order that you may begin to produce the well, and as requested in your phone conversation of January 30, 1987, we will process the completion of the above-referenced well as an oil well in the West Osudo Wolfcamp Pool since it is within the boundary of that pool as it is currently defined.

However, this does not prevent you from making application for a hearing to have the acreage deleted from the West Osudo Wolfcamp Pool and the creation of a Wolfcamp Gas Pool with special rules. If an order is issued to that effect the well will be removed from the West Osudo Wolfcamp Pool and placed in the newly created pool.

Very truly yours,

OIL CONSERVATION DIVISION
