RE: Reclassification of Well
New Mexico "C" State NCT-6 #2-P
Sec. 6, T19S, R37E

Gentlemen:

According to the recently submitted scheduled gas/oil ratio test the above-referenced well will be reclassified from a gas well to an oil well in the Eumont Pool effective July 1, 1992, and the gas allowable cancelled that date.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by April 30, 1992.

If the well is to be reclassified from gas to oil, you will need to file a revised acreage dedication plat, Form C-102, outlining 40 acres for this oil well completion. Also, if the gas transporter changes due to reclassification you will need to file C-104 so indicating. Also, since this well shares a 320-acre multiwell unit with #1-J you will need to get the proration unit reduced by the deletion of the 40 acres to be dedicated to the oil completion in well #2.

If you have questions concerning the above please contact Evelyn Downs at 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I

ed

submitted new test - remain gas
