SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to deepen or reentry to a different reservoir.
Use "APPLICATION FOR PERMIT—" for such proposals

SUBMIT IN TRIPLICATE

1. Type of Well

☒ Oil Well ☐ Gas Well ☐ Other

2. Name of Operator

Thomas Ray Sivley

3. Address and Telephone No.

6509 Wilton Ave.
Fort Worth, TX 76133

Telephone: (817)292-3283

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)

1600 FEL and 1500 FSL,
Section 28, Township 20S, Range 34E,
Unit J, Lea County, New MexicoFORM APPROVED
Budget Bureau No. 1004-0135
Expires: March 31, 19935. Lease Designation and Serial No.
NM-0392566. If Indian, Allottee or Tribe Name
None7. If Unit or CA, Agreement Designation
None8. Well Name and No.
Silver Federal Lease No. 29. API Well No.

- ☐
- Non-Routine Fracturing
-
- ☐
- Water Shut-Off
-
- ☐
- Conversion to Injection
-
- ☐
- Dispose Water

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Service Crew came onto location, 11/26/91. Reverse drilling was started at the depth of 3674'. Using a 4-3/4" bit, Ten (10") Feet of hole was drilled to a new depth of 3684'. At this point, after studying the samples and drill rate we felt that it was best to stop drilling due to a show of free oil in the samples.

11/27/91-In order to stimulate the zone to see if it would yeild oil we had Halliburton pump 1,000 Gallons of 15% Acid into the 2-3/8 tubing and open hole at; Seven (7) Bbls per minute at a pressure of 2,800 P.S.I. The acid was allowed to react for twenty (20) Minutes and was then swabbed back. After all apparent fluid had been swabbed back the well was left until 11/29/91

11/29/91 - Well was swabbed and a definative show of oil was present. At this point we decided that the best course of action was to bring in a pumping unit, make the appropriate installation of flow line, hook-up, etc., to tank battery and test the well for an undetermined period of time. As soon as we have determined the characteristics of this; Zone: "Yates C" we will decide how to complete this well. (Neutron Logs and Deviation Reports will be sent upon their completion.)

14. I hereby certify that the foregoing is true and correct.

Signed

Thomas R. Sivley
