order that well can be assigned increased allowables when authorized by the Division.

which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F.

Report casing pressure in lieu of tubing pressure for any well producing through casing.
