

EXHIBIT C is a plat showing the former State A-19 No. 1 Well (Amerada's Well No. 12), the proposed location for the State A-19 No. 2, and all of the roads, pads, pipelines, and other surface obstructions which had to be avoided in staking the new location. The closest location to the center of the tract that would accommodate the required drilling operations was at 1760' FSL and 624' FWL (EXHIBIT B).

Therefore, in order to protect this lease from future drainage and loss of correlative rights to its fair share of the remaining Eumont gas reserves under this lease, both a nonstandard gas proration unit and an unorthodox drilling location are necessary. Conoco requests that both of these exceptions to the well spacing regulations be granted.

Copies of this application have been sent by certified mail to all offset operators as shown on EXHIBIT A and listed in EXHIBIT D. Copies of the certified mail receipts are also attached as EXHIBIT E.

If there are any further question concerning this application please contact me at (915) 686-6548.

Very truly yours,
