13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well is no longer an economic oil producer. However, rather than plug the subject well, Read & Stevens is doing an evaluation of secondary potential in the Brushy Canyon in this area and requests TA approval be given on the subject well so that the wellbore may be used for water injection in the future for secondary recovery operations. A cast iron bridge plug will be set over existing perms and the wellbore tested to 500 psi w/ non-corrosive fluid.
