HYDROGEN SULFIDE DRILLING OPERATIONS PLANS PAGE 3

E. Mud Program

RECEIVED MAY 23 00 ROSWELL. NM

- 1. The Mud Program has been designed to minimize the volume of H2S circulated to the surface. Proper mud weights, safe drilling practices and the use of H2S scavengers will minimize hazards when penetrating H2S bearing zones.
- 2. A mud-gas separator will be utilized as needed.
- F. Metallurgy
- All drill strings, casing, tubing, wellhead, blowout preventers, drilling spool, kill lines, choke manifold and line and valves shall be suitable for H2S service.
- G. Communication
 - 1. Cellular telephone communications in company vehicles and mud logging trailer.
 - 2. Land line (telephone) communications at area office.
- H. Well Testing

Drill stem testing will be performed with a minimum number of personnel in the immediate vicinity, which are necessary to safely and adequately conduct the test. The drill stem testing in an H2S environment will be conducted during the daylight hours.
