RE: WELLBORE COMMINGLING
C. H. Weir "B" Well No. 2
Weir Blinebry East and
Skaggs Drinkard Pools
Lea County, New Mexico

ATTENTION: MR. JOE D. RAMEY

Gentlemen:

TEXACO INC. requests administrative approval to commingle in the wellbore oil production from the Weir Blinebry East and Skaggs Drinkard Pools in Well No. 2 on the C. H. Weir "B" Lease, located in Section 11, Township 20 South, Range 37 East, Lea County, New Mexico.

The subject well, for which wellbore commingling approval is requested, qualifies under the provisions of Statewide Rule 303(C), which provides for administrative application and approval of wellbore commingling. The well is currently completed in the Skaggs (Drinkard and Glorieta) Pools. A bridge plug is set above the Drinkard zone and the Drinkard zone has not produced since April, 1971. The Glorieta zone has not produced since December, 1973. Upon approval of this application the Glorieta zone will be squeezed with cement, the bridge plug and packer will be removed from the wellbore and the Weir Blinebry East zone will be opened. Production from the two zones will be by artificial lift. The Blinebry and Drinkard zones produce water below the specified limits. The fluids from these two reservoirs are known to be compatible. Ownership of the minerals in both zones is common, and the value of the commingled fluids is not less than the total value of the fluids if they were marketed separately. Secondary operations will not be jeopardized by approval of this application.

A data sheet, production decline curves, plat and a sketch of the present and proposed completion are attached.

A copy of this application is being mailed to each of the offset operators shown on the attached list.

Yours very truly,

J. V. GANNON

RE: WELLBORE COMMINGLING
O. H. Weir "B" Well No. 2
Weir Blinberry East and
Skaggs Drinkard Pools
Lea County, New Mexico

ATTENTION: MR. JOE D. RANNEY

Gentlemen:

TEXACO INC. requests administrative approval to commingle in the wellbore oil production from the Weir Blinberry East and Skaggs Drinkard Pools in Well No. 2 on the O. H. Weir "B" Lease, located in Section 11, Township 20 South, Range 37 East, Lea County, New Mexico.

The subject well, for which wellbore commingling approval is requested, qualifies under the provisions of Statute Rule 308(C), which provides for shut-in, selective application and approval of wellbore commingling. The well is currently completed in the Skaggs (Drinkard and Glorieta) Pools. A bridge plug is set above the Drinkard zone and the Drinkard zone has not produced since April, 1971. The Glorieta zone has not produced since December, 1973. Upon approval of this application the Glorieta zone will be squeezed with cement, the bridge plug and packer will be removed from the wellbore and the Weir Blinberry East zone will be opened. Production from the two zones will be by artificial lift. The Blinberry and Drinkard zones produce water below the specified limits. The fluids from these two zones are known to be compatible. Ownership of the minerals in both zones is common, and the value of the commingled fluids is not less than the total value of the fluids if they were marketed separately. Secondary operations will not be jeopardized by approval of this application.

1 Data sheet production decline curves, plot and a sketch of the present and proposed completion are attached.

2 A copy of application is being mailed to each of the other operators shown on attached list.

Yours very truly,

J. V. Gannon
