Strata B-14 No. 1 Hobbs, New Mexico May 16, 1956

Well No. 1 is located 1900 ft. from $\begin{matrix} \text{N} \\ \text{S} \end{matrix}$ line and 660 ft. from $\begin{matrix} \text{E} \\ \text{W} \end{matrix}$ line of sec. 14

$\frac{3}{4}$ Sec. 14 20S 37E N. M. P. U.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Fantom Lea New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 3000' with rotary tools in an attempt to develop high pressure "ucon gas reserves under the subject lease and to meet USCE demands to develop the high pressure gas in the immediate area.

It is planned to use the following casing pattern: 3 5/8" casing to be set at 300' and cemented with approximately 600 sacks, cement to be circulated; 5 1/2" casing to be set at total depth and cemented with approximately 1113 sacks, or as determined by survey, and to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company
