DALLAS, TEXAS

April 2, 1936.

Mr. F. J. Vesely,  
State Oil & Gas Inspector,  
Carlsbad, New Mexico.

Dear Sir:

Herewith you will find notice of intention to drill our No. 1 Weir well in Lea County, New Mexico, in triplicate. Kindly return one copy after it has been approved.

As soon as our bond is completed we will forward the same to you, unless you instruct us to send it to Santa Fe, New Mexico. Our operations on this well are in charge of Mr. I. L. Dillard, and as soon as we have definite information as to his mailing address we will furnish same to you. A temporary mailing address for Mr. Dillard is in care of the Continental Supply Company at Hobbs New Mexico, and we wish you would forward to him at this address circulars one and two issued by the Oil Conservation Commission in connection with the oil and gas conservation law for your State.

We wish to make every possible effort to cooperate with you and furnish you all necessary reports, and will appreciate your suggestions, either in the field or to this office as you may find it advisable.

Very truly yours,

C AND G OIL COMPANY, INC.

By

  
Treasurer.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The investigator must first identify the problem and then determine the scope of the study. The next step is to design the study. This involves determining the research design, the sample size, and the data collection methods. The third step is to collect the data. This is done by the investigator who is responsible for the study. The data is then analyzed and the results are reported. The final step is to draw conclusions from the data. This is done by the investigator who is responsible for the study.
