

supply and each productive zone will be tested separately in the well, as required by the Commission.

6. Approval of the proposed dual completion is in the interest of conservation and will serve to prevent waste and protect correlative rights.
7. That by copy of this letter of application, all offset operators are notified of this application.

We further respectfully request approval under the provisions of Rule No. 5(b) of the Special Rules and Regulations for the Eumont Gas Pool of Order No. R-520 of a 160-acre non-standard gas proration unit consisting of the W/2 of the E/2 of said Section 15 to be allocated to the said well No. 8. In support of this request we should like to point out that the proposed unit conforms with the requirements of said Rule 5(b) in all respects as follows:

1. Said proposed non-standard gas proration unit consists of contiguous quarter-quarter sections.
2. Said proposed non-standard gas proration unit lies wholly within a single governmental section.
3. The entire proposed non-standard gas proration unit may be reasonably presumed to be productive of gas.
4. The length or width of said proposed non-standard gas proration unit does not exceed 5,280 feet.
5. Copies of this application have been furnished this date by registered mail to all offset operators and all operators within 1,500 feet of said well, as required by the provisions of said Rule 5(b).

A plat is attached hereto showing to the best of our knowledge and belief the proposed unit, the location of the No. 8 well and other wells on the lease, offset wells and ownership thereof.

Continental Oil Company also respectfully requests approval under the provisions of Rule 3 of the Special Rules and Regulations for the Eumont Gas Pool of Order No. R-520 for an unorthodox location for said well No. 8 and in support thereof states:

1. Approval of a non-standard location is necessitated by the dual completion in the Eumont Gas Pool of a well previously drilled to another horizon.
2. Approval of an unorthodox location for said well for the production of gas is in the interest of conservation, will prevent waste, prevent the drilling of an unnecessary well, and will protect correlative rights.
