

I hereby certify that the above information is true and complete to the best of my knowledge and belief.

.. .. . amount of oil produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity bases will be 0.60.

0.00%
The amount of money for any well producing through casing.

Report casing pressure in lieu of tubing pressure for any well producing commercial quantities of gas.

Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with Rule 301 and appropriate pool rules.
