

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	<input checked="" type="checkbox"/>	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Monument, New Mexico

1. The first step in the process of identifying and assessing the risks of a project is to identify the potential risks. This can be done by conducting a thorough review of the project's objectives, scope, and timeline. It is also important to consult with stakeholders and experts who have experience with similar projects. Once the risks have been identified, the next step is to assess their potential impact on the project. This can be done by estimating the likelihood of each risk occurring and the potential consequences if it does. The final step in the process is to develop a risk management plan. This plan should outline the steps that will be taken to avoid, minimize, or transfer the risks. It should also specify the roles and responsibilities of the project team members in managing the risks.

undergraduate and began to work as a scientist
