Detailed account of work done, nature and quantity of materials used and results obtained.

In accordance with our Notice of Intention to Plug Back; Form C-102; filed July 27, 1956 we set a cement plug of 100 sacks which filled hole from 3875' to 3795', and a second cement plug of 25 sacks which filled hole from 3795' to 3750'.

After cement had been allowed sufficient set time we tested the well for production and found that we had not only shut off the water but had also shut off practically all oil. We decided, therefore, to abandon this operation temporarily.

Recent production tests on this well show a potential of five barrels of oil daily and we therefore petition that we be given an allowable for this amount.
