The elevation of the derrick floor above sea level is 3573 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 3865 in lime. It is proposed to treat pay formations from 3767 to 3865 with 1000 gallons acid solution.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
