WATER RESOURCES DIVISION

Report of the Director, Division of Water Resources, on the work of the Division during the year 1941.

The Division of Water Resources has been organized since 1933, and during the past year has continued its work in the field of water resources.

The Division is organized into three main branches: the Branch of Water Conservation, the Branch of Water Control, and the Branch of Water Development.

The Branch of Water Conservation is concerned with the study of the water resources of the United States, and with the development of methods for the conservation of these resources.

The Branch of Water Control is concerned with the study of the problems of water control, and with the development of methods for the control of water.

The Branch of Water Development is concerned with the study of the problems of water development, and with the development of methods for the development of water.

The Division has been very successful in its work during the past year, and has made many important contributions to the knowledge of water resources.

The Division is now planning to continue its work in the field of water resources, and to make still more important contributions to the knowledge of water resources.

The Division is now planning to continue its work in the field of water resources, and to make still more important contributions to the knowledge of water resources.
