TD: 3850 PB to 3838 Lime

5½" casing cemented at 3650 with 150 sacks.

When this well was being prepared for a special GOR test, it was determined that the well was dead. Attempts to make well flow, failed. On the last test made on well, 9-20-47, well flowed 22 bbls oil and 2 bbls water in 24 hours.

In an attempt to make this well a commercial producer, hole has been reamed to bottom, Lane-Wells survey, Dowell Spinner survey, and a caliper survey have been made. 2" tubing has been run with Lane-Wells formation packer set at 3730. Tubing was swabbed with no test. We now desire to acidize 3730-3838 with 2000 gals Dowell acid.
