**Re: Application to Dually Complete  
State "A" 20, No. 1, Eunice-  
Monument Pool, Lea County,  
New Mexico.**

**Dear Sir:**

**Reference is made to your application of August 24, 1954, pertaining to the approval of a dual completion of the above captioned well.**

**This Commission cannot approve your dual completion as outlined on your application due to the fact that there is an obvious error in the formation names on the application.**

**You will note that in paragraph (C) (3) that you refer to the lower Seven Rivers oil zone being produced through the tubing and Queen Sands gas through the tubing-casing annulus. The Queen Gas Sands are located geologically below the Seven Rivers formation.**

**We would also like to call your attention to the fact that this Commission by virtue of Order R-520, established the Eumont Gas Pool as producing from the Yates-Seven Rivers and Queen. The underlying Eunice-Monument Oil Pool is now described as producing from the Grayburg-San Andres formation. It is entirely possible that your application should have referred to the Queen formation as the gas bearing formation and the Grayburg-San Andres as the oil bearing formation.**

**Please examine the completion data on this well and if necessary re-submit your application.**

**Very truly yours,**

**W. B. Macey  
Secretary - Director**
