

Rivers-Queen section and acidized with 500 gallons. Production packer was set at 3575 to effect the dual completion, after which the well tested 4838 MCFFPD against 945 psig from the gas zone and 5.5 BOPD plus 89 EWPD from the oil zone, on September 8 & 10, 1954, respectively. On September 28, 1954, report was filed on pressure testing performed on September 15, 1954, which established no communication between the oil and gas zones.

Concerning the exception to Rule No. 2, we wish to state the following:

- (A) The unorthodox location was occasioned by the recompletion of the well previously drilled to another horizon.
- (B) All operators within a 1980' radius of the subject well have been furnished a copy of this application.

With regard to the exception to Rule No. 5(a), we wish to state the following:

- (A) That the proposed non-standard gas proration unit of 320 acres consisting of the E/2 Section 21, T-20-S, R-37-E, is composed of contiguous quarter-quarter sections.
- (B) That the proposed non-standard gas proration unit lies wholly within a single governmental section.
- (C) That the entire proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
- (D) That the length or width of the proposed non-standard gas proration unit does not exceed 5280'.
- (E) That the entire proposed non-standard gas proration unit lies within the horizontal limits of both the Bumont Gas Pool and the Eunice-Monument Oil Pool.
- (F) That by copy of this letter of application all offset operators owning interest in the section in which the non-standard gas proration unit is situated and which acreage is not included in said non-standard gas proration unit and all operators owning interest within 1500' of the well have been notified by registered mail of this application.

Yours very truly,

Ralph S. Hendrickson
Field Superintendent
